TailwindCss

React Query

C#

Git

EDUCATION

High School Diploma

Refiners Schools

2017 – 2020

Computer Science Bsc.

Covenant University

2021 – 2025

PROFILE

Hi there, I am a Frontend Web Developer.

I like developing visually appealing, intuitive, and responsive online apps using tools like Nextjs, TailwindCSS, and Reactjs for the front end, Firebase for the back end, and Git and Github for managing my dev operations and team collaborations.

I'm currently concentrating on Zustand and Framer Motion to develop my web development skills.

I am extremely driven and devoted to learning new skills.

Check out a couple of my projects on my [Github profile](#).

WORK EXPERIENCE

Landing Page

- Devised a responsive homepage for all screens of a website with a form to collect user information.

Expenses Chart

- Made an application that displays the day-to-day expenses of a person in the form of a bar chart, using Chart.Js

Rating Component

- Developed a rating component that accepts user info for websites

Notifications Page

- Developed a responsive notifications user interface(UI) to simulate notification buildup on mobile and desktop devices.

KonfamPay / Front End Engineer

October 2022 – March 2023

- Building software to eradicate payment insecurities and scams in Nigeria

BellPay / Front End Developer

April 2023 – Present (3 months +)

- Providing secure and reliable payment services to individuals and businesses in Nigeria and beyond.

Frontend Developer at the Creator's Community

Hebron Startup Lab

April 2023 – Present (3 months +)
